26 December, 2020

Director,
Office of Consumer Protection,
MoEA, Thimphu.

Sub: Price Fixation for Local and Imported Fruits and Vegetables.

Dear Sonam,

The Ministry of Agriculture and Forests have fixed the prices for local and imported fruits and vegetables for implementation during the present lockdown period. The prices are fixed based on Cost of Production for local fruits and vegetables. Likewise, the prices are fixed based on landing prices at the point of entry at the border towns for the imported fruits and vegetables.

The price is calculated with technical reference to protect the interest of our farmers and the consumers. The price schedule, however is a suggestion to the OCP to refer it as a basis in monitoring prices of fruits and vegetables in the markets. Market price normally does not tally with our calculated price due to varying factors. The MoAF will use the farm gate price as a basis for buyback of local produces if necessary.

Thanking you

Sincerely,

Rinzin Dorji
